PERSONAL PROJECTS

InstaPages CMS (02/2025 - Present)

- InstaPages CMS** is an easy-to-use platform built with **Filament** and **Laravel** for managing website content. It offers a simple yet powerful backend for page and media management, while the **Blade, Bootstrap, and jQuery** frontend ensures interactive, responsive pages. The customizable **hero section** allows for dynamic content with foreground images and features.

CentralAPI (01/2025 - Present)

- CentralAPI is a multi-tenant Laravel backend API that powers multiple applications with centralized authentication, data management, and third-party integrations. It ensures secure and efficient communication across apps with independent tenant data.

ACHIEVEMENTS

Built 20+ dynamic, mobile-responsive websites.

Specialized in WordPress and e-commerce sites, delivering tailored solutions for diverse clients.

Completed KodKloud Level 1 System Administrator

Developing expertise in Linux system management and automation tools, including Git, Docker, Ansible, Jenkins, Kubernetes, and Azure Cloud, to streamline development and deployment processes.

EDUCATION
